Benefits

Consultants and Engineers

- Enhance your visibility within the industry
- Search the manufacturer product directory by >100 product areas
- Find integrators capable of implementing your designs
- Obtain manufacturer A&E product specifications
- Access valuable design resources
- Hear of timely, consultant-specific events

Manufacturers

- Search the extensive database of security consultants
- Maintain 24/7 online company visibility
- Profile your company in Feature Pages
- Be visible in product searches
- Provide links to Manufacturer A&E product specifications
- Highlight your interest in reaching security consultants

Integrators

- Know who is specifying projects in your area
- Initiate a dialog before a project is bid
- Provide input on products and technologies
- Make consultants aware of your firm and capabilities
- Increase your awareness of projects
- Support your key manufacturers

Owners and End Users

- Understand the value added by a security consultant
- Develop a qualified list of security designers
- Gain insight into size and capabilities of specifying firms and individuals

**Why consider a
professional
security
consultant?**

- Understand overall security risks and design objectives
- Increase understanding of facility and project requirements
- Develop realistic budgets and gain assistance with project justification
- Gain insight into most effective security products and technologies
- Provide biddable, vendor neutral drawings and specifications
- Maintain professional supervision of bid process and implementation

Ducibella Venter & Santore

DVS - North Haven, CT
www.dvssecurity.com

Ducibella Venter & Santore (DVS) is one of the oldest and most trusted independent security consulting and engineering firms in the United States. DVS has a world-renowned client base, and has provided security consulting and engineering, project management, and construction administration services to a wide base of commercial, cultural, educational, and residential institutions around the world.

Brian Coulombe Senior Associate

Brian P. Coulombe is a Senior Associate at Ducibella Venter & Santore (DVS). Brian holds a B.S. in Electrical Engineering from Lehigh University in Bethlehem, PA. After graduating from Lehigh in 2004, Brian worked as an integrator for Transcore ITS, Inc., deploying intelligent transportation and network-based communication systems. In 2006, Brian joined DVS as an engineer and project manager. Through his years at DVS, Brian has managed security engineering and design projects for the World Trade Center (NY), Independence National Park, the Federal Reserve Bank of Boston, and Princeton University.

Company Overview

Panduit is a world-class developer and provider of leading-edge solutions that help customers optimize the physical infrastructure through simplification, agility and operational efficiency. Panduit Unified Physical Infrastructure™ (UPI) based solutions give enterprises the capabilities to connect, manage and automate communications, computing, power, control and security systems for a smarter, unified business foundation. Strong relationships with technology leaders complemented with its global staff and unmatched service and support, make Panduit a valuable and trusted partner.

Panduit's Security Solution Strategy is designed to leverage IP connectivity and modern technology to create a centralized security operations center (SOC) that, as part of the UPI, monitors and responds to alarm events at all of Panduit's global locations. By deploying a UPI-based Connected Building architecture, both physical and logical networks (Card Access Control, Video Surveillance, HVAC, Power, Fire/Life/Safety systems) are converged.

Product Areas

Copper Systems

Panduit offers a full line of innovative copper products that meet the most demanding industry requirements for data and telecommunication applications. Systems are designed to support emerging technologies, including Voice over IP and Gigabit Ethernet and exceed the latest industry standards to provide assurance of network reliability. Copper jack modules, patch cords, patch panels, punchdown systems, cable assemblies, and pre-terminated solutions provide the greatest value by assuring reliability and providing foundation for future network growth.

Fiber Optic Systems

Panduit provides high bandwidth and mission critical physical infrastructures in data center, enterprise, and campus networks with comprehensive fiber optic systems that deliver high performance, reliability and scalability. By leveraging its technology leadership, innovative design and cable management expertise, Panduit fiber optic systems meet today's requirements and provide a migration path for tomorrow's applications. These advanced fiber optic systems include fiber optic cable, connectors, adapter modules, adapter panels, cassettes, enclosures, patch cords, cable assemblies, cable distribution products and accessories for both singlemode and multimode applications. Together, these components provide complete solutions for today's high data rate Fibre Channel and Ethernet applications, and support future readiness for 40 Gbps and 100 Gbps data rates, maximizing physical infrastructure performance, modularity, and scalability.
